Interests	animations, digital illustration, video games

WORK EXPERIENCE

The Broad Institute (Cambridge, MA) May 2023 - March 2025
Frontend Developer, Data Visualization

- Transform complex biomedical data from REST APIs or local files into unique data visualization single page applications using D3, React, Vue and NativeScript for 5+ MIT and Harvard labs
- Translate biomedical information into info-graphics using design principles and Adobe Illustrator and Photoshop to support content for 20+ NIH published research papers
- Own end-to-end lifecycle of 5+ data portal projects, including ideation, design, development, documentation, and testing for static and server-side web applications
- Mentor and collaborate with interns in achieving project deliverables and exchanging feedback

Moody's (Remote) January 2022 - June 2022
Software Engineer, Frontend Co-Op

- Contribute to front-facing bank and customer web platforms using AngularJS and eliminate code vulnerabilities for more than 400k+ businesses and 30k+ financial institutions
- Improve customer loan application for mobile device accessibility and responsiveness in close collaboration with 5+ user experience designers and software engineers to improve SEO
- Utilize daily stand-ups and practice Agile/ Scrum software development with Atlassian Jira, Confluence, and Bamboo for managing multiple project responsibilities

Chewy (Boston, MA) January 2020 - June 2020
User Experience Developer Co-Op (Design Systems)

- Build and maintain 30+ user interface components and layouts in Chirp Design System, a Storybook JS library utilized by all software engineering teams at Chewy in VueJS
- Collaborate with 5+ product designers, project managers, and quality assurance engineers to transform interactive InVision prototypes into high quality web prototypes for user research
- Participate in user research sessions to immerse and empathize with customer perspective
- Integrate Jest snapshot tests, ARIA labels, and i18n to ensure components are accessible and comply with WCAG guidelines using UsableNet

EDUCATION

Northeastern University 2022 - 2023
College of Arts, Media, and Design
Masters of Science in **Information Design + Data Visualization**

Northeastern University 2018 - 2022
Khoury College of Computer Sciences
Bachelor of Science in **Computer Science and Interaction Design**
